NEW MILLENNIUM SICAV

BOARD OF DIRECTORS' REPORT

Dear Shareholder,

the Board of Directors of NEW MILLENNIUM SICAV (hereafter the "Company") takes pleasure in presenting its annual report together with the annual accounts of the Company for its first financial year ended on 31 December 2022.

..*

1.CORPORATE GOVERNANCE

The Company

The Company is a Luxembourg investment company (Société d'investissement à capital variable) incorporated for an unlimited duration in Luxembourg on 11 August 1999 and organized under the Luxembourg Law of 17 December 2010 on undertakings for collective investment (the Law of 17 December 2010) and the Law of 10 August 1915 on commercial companies, as further amended and supplemented.

The Company was initially qualified as a self-managed investment company within the meaning of art. 27 of the Law of 17 December 2010; effective from 1 January 2017 the Company has designated Natam Management Company S.A. (NATAM), a management company governed by Chapter 15 of the Law of 17 December 2010 and authorised pursuant to the UCITS Directive.

The rules of conduct

In performing its activity NATAM complies, at all times, with the rules of conduct set in the Law of 17 December 2010 such as: to act honestly and fairly in conducting its business activities in the best interest of the clients and the integrity of the market; to act with due skill, care and diligence, to have and efficiently employ resources and procedures that are necessary for the proper performance of the business activities; to try to avoid conflict of interest and when they cannot be avoided, to ensure that the clients are fairly treated and to comply with all the regulatory requirements.

In addition NATAM, as part of the Banca Finnat Group, has adopted the Banca Finnat Ethical Code, which applies to all directors, employees and collaborators of the group (last release October 2022) and it has also adopted the ALFI Code of Conduct, to set a framework of high-level principles and best practice recommendations for the governance of the Company.

The Board of Directors' composition

The Annual General Meeting of the Company, held on 29th April 2022, has elected three board members (Mr. Sante Jannoni, chairman, Mr. Emanuele Bonabello, vice chairman, and Mrs. Paola De Simone) until the following general meeting of shareholders to be held in 2023.

The Board of Directors remuneration

Each director is paid a fixed annual remuneration respecting the maximum threshold of 25.000 Euro. The remuneration, which reflects responsibilities and experience and is fair given the size and complexity of the Company has been approved by the shareholders at the Annual General Meeting of shareholders.

Board of Directors meetings

The Board of Directors meets at least twice a year. Additional meetings are arranged if necessary.

In 2022, four regular Board meetings were held. At the regular Board meetings, NATAM reports on various relevant topics, amongst others, financial and operational risks, investment compliance monitoring, valuation issues, marketing and sales activities, anti-money laundering matters (confirming the low tolerance to ML/FT risk) and regulatory update.

Annual General Meeting

The Annual General Meeting of the shareholders (AGM) was duly held on 29th April 2022 in Luxembourg. During the meeting, the shareholders i) approved the management report of the Board of Directors and the report of the auditor for the financial year ended as per 31 December 2021; ii) approved the audited statements of assets and liabilities and the statement of operations for the financial year ended as per 31 December 2021; iii) approved the allocation of the net results for the financial year ended as per 31 December 2021; iv) ratified the decision taken by the Board of Directors until the AGM held in 2022 and granted full discharge to the members of the Board of Directors with respect to their performance of duties for all or part of the financial year ended as per 31 December 2021; v) elected the directors and set their remuneration, as mentioned above; vi) re-elect the auditor, PricewaterhouseCoopers, to serve for the financial year 2022.

2.SIGNIFICANT EVENTS OCCURRED DURING THE FINANCIAL YEAR

Appointement of a new "responsable du contrôle du respect des obligations AML" (RC)

Following a reorganization of the function within the BFE Group, in January 2022 it was decided to replace Mr. Stefano Montaina as RC of the SICAV with Mr. Sante Jannoni.

Internal Procedure Manual

Over the period of reference, the members of the Board have worked - with the support of the appointed management company - to maintain duly updated the procedures of the SICAV, to grant compliance with the regulatory and best practice evolutions as well as the expectations of the Luxembourg arena. As result, in October 2022 the Board finally validated an updated version of its Internal Procedure Manual whose main topics are (inter alia): Corporate Governance Structure, ICT Outsourcing, Risk Taxonomy, Protection of Investors in case of NAV Calculation Error/ Non Compliance with investment rules, Anti Money Laundering and Conflict of Interest.

Prospectus:

During the year 2022 the Prospectus has been updated

on March 2022:

- to grant fully compliance with the CSSF Circular n. 20/764 (which applies the ESMA guidelines n.34-39-992 on performance fees in UCITS);
- to apply the High-Water Mark principle to calculate the performance of the sub-fund Multi Asset Opportunity;
- to amend the name of the components of the Conducting Persons Committee of the appointed Management Company (NATAM);
- to reflect the changes required under Articles 6 and 7 of the Regulation (EU) 2020/852 (Taxonomy Regulation).

on December 2022, effective date 1st January 2023:

- to amendment of the composition of the Board of Directors, according to the resolution held by the AGM;
- to update the regulatory reference to the Italian Law on PIR (2022 Budget Law) for the sub-funds Augustum
 Italian Diversified Bond and PIR Bilanciato Sistema Italia;
- to disclose of the investment in SPAC, as per Law of 17 December 2010 FAQ, version 1.4 December 2021 for the sub-funds investing in equity;
- to amend the section "Sustainability criteria in investment decisions" in relation to the sub-funds SFDR Article 8;
- to modify the benchmark of some sub-funds;
- to amend the methodology for the calculation of the global exposure for the sub-funds Euro Equities and Global Equities (Eur Hedged), from Absolute VaR to "Commitment Approach.;
- to include the pre-contractual disclosure referred to Regulation EU 2019/2088.

3.SUB FUNDS' PERFORMANCE

Investments Manager: Banca Finnat Euramerica S.p.A.

New Millennium - Balance World Conservative

The sub-fund closed the year with a NAV of 147.29 and a performance of -12.27% (Class I), 3.22% lower compared to the benchmark.

The origins of the result achieved must be sought in the Russo-Ukrainian war, which produced a significant increase in the prices of raw materials with a consequent surge in inflation, which unleashed an aggressiveness of restrictive policies by the Central Banks that has not been seen for weather. Suffice it to consider that the FED carried out what has been assessed as the most sudden and substantial rate hike in the last 40 years. The bond portion was however maintained at an average rating of BBB, while the equity portion, starting from the second half of the year, left the Asian area to increase the weight of the European one, remaining on average at a weight close to the benchmark (20%). Gradual reduction of the overweight on the dollar which around the 1.02 area was brought from around 15% to 12.5% (benchmark weighting) and then slightly reduced below 11%.

New Millennium - Euro Equities

The sub-fund closed the year with a NAV of 68.94 and a performance of -12.83% (Class I) while the performance of the benchmark was -10.05%.

The selection model, in which greater diversification towards "non-ultra" Large Cap stocks prevails, was not rewarding throughout the year. The overall average equity exposure in 2022 remained in line with that of the benchmark, as well as the weights in the sectors.

New Millennium - Euro Bond Short Term

The sub-fund closed the year with a NAV of 132.69 and a performance of -3.75% (class I), however managing to outperform the benchmark by 66 bps. It was a difficult year with central banks committed to raising key rates and at the same time reducing the amount of liquidity to inject into the system.

The Btp-Bund spread rose by 80 bps, closing at 210 bps. The sub-fund had a very low duration, close to 1, throughout the year and only in November was it raised to 1.6, through positioning on short stretches of both the "core" and "peripheral" European government curves and a 2-4y maturity exposure on corporate bonds.

New Millennium - Global Equities Euro Hedged

The sub-fund closed the year with a NAV of 113.26 and a performance of -20.44% (Class I), against a benchmark which recorded a performance of -17.44%.

Equity exposure was in line with the benchmark. The slight equity overweight towards the ultra large caps of the list generated the relative underperformance. The average equity exposure during the year was around 95%, with constant exchange risk hedging.

New Millennium - Inflation Linked Bond

The sub-fund closed the year with a NAV of 110.69 and a performance of -3.96% (class I) with an underperformance compared to the benchmark of 2.80%. Although the fund was defensive for most of the year, performance was penalized by widespread selling off in the bond markets, which also affected linkers. During the year, portfolio choices were oriented towards the 3-5 year section of the curve accompanied by a duration of around 1.6, which was extended to 2.6 only in the last month by positioning ourselves on securities in the long section of the curve. In 2022 we had a reduced exposure to commodities (in the range between 2% and 5%), as these started the year at high price levels.

New Millennium - Large Euro Corporate

The sub-fund closed the year with a NAV of 132.10 and a performance (referred to Class I) of -10.15%, 253 bps behind its benchmark. 2022 was the year in which all the markets suffered, but the bond market in particular suffered from the surge in inflation which resulted in a sudden rise in rates as an inevitable consequence. The duration of the sub-fund remained throughout the year between a value of 2.80 and 3.

New Millennium - PIR Bilanciato Sistema Italia

The sub-fund closed the year with a NAV of 93.30 and a performance of -16.73% (Class I) with a gap from the benchmark of 745 bps.

The markets started the year immediately in a negative way, displaced by the Russian invasion of Ukraine and the consequent war which produced a sudden rise in energy raw materials which, as in the case of gas, reached record prices never seen before. The causes of the underperformance compared to the reference index mainly lie in the fact that the main list (where the portfolio is little invested) clearly outperformed the Mid, Mini and Micro Cap lists where, due to its characterization, the bulk of the equity portfolio is invested. Average equity exposure was around 40%. The duration of the bond part was between 2.8 and 3.2 for almost the entire year; only in the finale was the value 4 brought back above.

Investments Manager: Az Swiss & Partners S.A.

New Millennium - Augustum Corporate Bond

The sub-fund closed the year with a NAV of 229.73 and a performance of -7.95% (Class I).

Inflation and monetary policy were the main market themes in 2022. Central banks have shown growing concerns about the rise in consumer price indices, changing their view on inflation and starting to fear harsh countermeasures since the first weeks of the year. The situation was further exacerbated by the sudden Russian invasion of Ukraine on February 24th. The sanctions promptly imposed by Europe and the United States in response have led to a significant increase in the price of energy raw materials exported by Russia, especially natural gas.

The inflationary spiral intensified in the second quarter and, in parallel, so did the responses of central banks. The Fed moved first and moved very quickly, starting a hike cycle at the fastest pace since the 1980s: it went from a 25 basis point hike in March to a 75 basis point hike in June. The inflationary and geopolitical situation led to heavy losses on the equity, credit and interest rate markets, with credit spreads returning to levels comparable to those of the first quarter of 2020 and equity indices recording losses of more than 20%.

In this difficult context, the manager took advantage of the opportunities that emerged from the violent market sell-off to improve the risk-return profile of the sub-fund, dynamically managing credit risk hedging, through CDS indices, and interest rate, through bond futures European governments.

Despite the volatility of the markets during the summer, the manager continued to optimize the portfolio structure, replacing low-yield issues with more attractive bonds in terms of risk and return. After months of almost constant increases, the trend in consumer price indices in the United States and Europe reversed in the fourth quarter. This led the Central Banks to slow down the process of normalizing monetary policy, going from hikes of 75 bps to 50 bps during their December meetings.

However, the tones of Powell and Lagarde remained tough: to maintain the credibility of their institutions, they reiterated during the last meeting that, albeit at a more moderate pace, the increases will continue until there is convincing evidence that the inflation has returned under control, paying particular attention to the dynamics of the labor market. The markets recorded positive performances in the quarter, especially in November, to then correct their course after the December meetings of the Fed and ECB. Starting in October, the manager increased exposure to interest rate and credit risk, increasing the convexity of the portfolio. This made it possible to fully grasp the rebound in the credit market and in interest rates.

New Millennium - Evergreen High Yield Bond

The sub-fund closed the year with a NAV of 84.78 and a performance of -10.16% (Class I).

Inflation and monetary policy were the main market themes in 2022. Central banks have shown growing concerns about the rise in consumer price indices, changing their view on inflation and starting to fear harsh countermeasures since the first weeks of the year. The situation was further exacerbated by the sudden Russian invasion of Ukraine on February 24th. The sanctions promptly imposed by Europe and the United States in response have led to a significant increase in the price of energy raw materials exported by Russia, especially natural gas.

The inflationary spiral intensified in the second quarter and, in parallel, so did the responses of central banks. The Fed moved first and moved very quickly, starting a hike cycle at the fastest pace since the 1980s: it went from a 25 basis point hike in March to a 75 basis point hike in June.

The inflationary and geopolitical situation led to heavy losses on the equity, credit and interest rate markets, with credit spreads returning to levels comparable to those of the first quarter of 2020 and equity indices recording losses of more than 20%.

In this difficult context, the manager took advantage of the opportunities that emerged from the violent market sell-off to improve the risk-return profile of the sub-fund, however limiting operations due to the small size of the sub-fund.

After months of almost constant increases, the trend in consumer price indices in the United States and Europe reversed in the fourth quarter. This led the Central Banks to slow down the process of normalizing monetary policy, going from hikes of 75 bps to 50 bps during their December meetings. However, the tones of Powell and Lagarde remained tough: to maintain the credibility of their institutions, they reiterated during the last meeting that, albeit at a more moderate pace, the increases will continue until there is convincing evidence that the inflation has returned under control, paying particular attention to the dynamics of the labor market.

The markets recorded positive performances in the quarter, especially in November, to then correct their course after the December meetings of the Fed and ECB.

New Millennium - Augustum Extra Euro High Quality Bond

The sub-fund closed the year with a NAV of 107.23 and a performance of -4.39% (Class I).

Inflation and monetary policy were the main market themes in 2022. Central banks have shown growing concerns about the rise in consumer price indices, changing their view on inflation and starting to fear harsh countermeasures since the first weeks of the year. The situation was further exacerbated by the sudden Russian invasion of Ukraine on February 24th. The sanctions promptly imposed by Europe and the United States in response have led to a significant increase in the price of energy raw materials exported by Russia, especially natural gas.

The inflationary spiral intensified in the second quarter and, in parallel, so did the responses of central banks. The Fed moved first and moved very quickly, starting a hike cycle at the fastest pace since the 1980s: it went from a 25 basis point hike in March to a 75 basis point hike in June. The inflationary and geopolitical situation led to heavy losses on the equity, credit and interest rate markets, with credit spreads returning to levels comparable to those of the first quarter of 2020 and equity indices recording losses of more than 20%.

During this difficult market context, the manager maintained an overexposure to the US dollar, exploiting the opportunities offered by the market to take a position on particularly penalized stocks. After months of almost constant increases, the trend in consumer price indices in the United States and Europe reversed in the fourth quarter. This led the Central Banks to slow down the process of normalizing monetary policy, going from hikes of 75 bps to 50 bps during their December meetings. However, the tones of Powell and Lagarde remained tough: to maintain the credibility of their institutions, they reiterated during the last meeting that, albeit at a more moderate pace, the increases will continue until there is convincing evidence that the inflation has returned under control, paying particular attention to the dynamics of the labor market.

The markets recorded positive performances in the quarter, especially in November, to then correct their course after the December meetings of the Fed and ECB. During this period, the manager maintained the overweight exposure to the US dollar.

New Millennium - Augustum High Quality Bond

The sub-fund closed the year with a NAV of 157.74 and a performance of -3.48% (Class I).

Inflation and monetary policy were the main market themes in 2022. Central banks have shown growing concerns about the rise in consumer price indices, changing their view on inflation and starting to fear harsh countermeasures since the first weeks of the year. The situation was further exacerbated by the sudden Russian invasion of Ukraine on February 24th. The sanctions promptly imposed by Europe and the United States in response have led to a significant increase in the price of energy raw materials exported by Russia, especially natural gas.

The inflationary spiral intensified in the second quarter and, in parallel, so did the responses of central banks. The Fed moved first and moved very quickly, starting a hike cycle at the fastest pace since the 1980s: it went from a 25 basis point hike in March to a 75 basis point hike in June. The inflationary and geopolitical situation led to heavy losses on the equity, credit and interest rate markets, with credit spreads returning to levels comparable to those of the first quarter of 2020 and equity indices recording losses of more than 20%.

Duration was actively managed in volatile market conditions through Bund and BTP futures. The manager also maintained an overweight exposure to inflation-linked bonds in the early months of the year. Despite the market volatility in the summer, the manager continued to optimize the portfolio structure, taking advantage of market opportunities to improve the efficiency of the fund's corporate investment grade component. After months of almost constant increases, the trend in consumer price indices in the United States and Europe reversed in the fourth quarter.

This led the Central Banks to slow down the process of normalizing monetary policy, going from hikes of 75 bps to 50 bps during their December meetings. However, the tones of Powell and Lagarde remained tough: to maintain the credibility of their institutions, they reiterated during the last meeting that, albeit at a

more moderate pace, the increases will continue until there is convincing evidence that the inflation has returned under control, paying particular attention to the dynamics of the labor market.

The markets recorded positive performances in the quarter, especially in November, to then correct their course after the December meetings of the Fed and ECB. In October, the manager closed all interest rate risk hedges and brought the portfolio to natural duration, fully capturing the November rebound. The portfolio was kept fully invested until the end of the year, with the aim of maintaining the asset allocation also during the first part of the new year.

New Millennium - Augustum Italian Diversified Bond

The sub-fund closed the year with a NAV of 131.94 and a performance of -10.15% (Class I).

Inflation and monetary policy were the main market themes in 2022. Central banks have shown growing concerns about the rise in consumer price indices, changing their view on inflation and starting to fear harsh countermeasures since the first weeks of the year. The situation was further exacerbated by the sudden Russian invasion of Ukraine on February 24th. The sanctions promptly imposed by Europe and the United States in response have led to a significant increase in the price of energy raw materials exported by Russia, especially natural gas.

The inflationary spiral intensified in the second quarter and, in parallel, so did the responses of central banks. The Fed moved first and moved very quickly, starting a hike cycle at the fastest pace since the 1980s: it went from a 25 basis point hike in March to a 75 basis point hike in June. The inflationary and geopolitical situation led to heavy losses on the equity, credit and interest rate markets, with credit spreads returning to levels comparable to those of the first quarter of 2020 and equity indices recording losses of more than 20%.

In this difficult context, the manager exploited the opportunities that emerged from the violent market sell-off (which also affected peripheral countries) to improve the risk-return profile of the sub-fund. Despite the market volatility during the summer, the manager continued to optimize the portfolio structure, with the aim of increasing its convexity. After months of almost constant increases, the trend in consumer price indices in the United States and Europe reversed in the fourth quarter.

This led the Central Banks to slow down the process of normalizing monetary policy, going from hikes of 75 bps to 50 bps during their December meetings. However, the tones of Powell and Lagarde remained tough: to maintain the credibility of their institutions, they reiterated during the last meeting that, albeit at a more moderate pace, the increases will continue until there is convincing evidence that the inflation has returned under control, paying particular attention to the dynamics of the labor market.

The markets recorded positive performances in the quarter, especially in November, to then correct their course after the December meetings of the Fed and ECB Since October, the manager has continued to increase the convexity of the portfolio, fully capturing the market rebound in November.

New Millennium - Augustum Market Timing

The sub-fund closed the year with a NAV of 112.10 and a performance of -8.39% (Class I).

Inflation and monetary policy were the main market themes in 2022. Central banks have shown growing concerns about the rise in consumer price indices, changing their view on inflation and starting to fear harsh countermeasures since the first weeks of the year. The situation was further exacerbated by the sudden Russian invasion of Ukraine on February 24th. The sanctions promptly imposed by Europe and the United States in response have led to a significant increase in the price of energy raw materials exported by Russia, especially natural gas.

The inflationary spiral intensified in the second quarter and, in parallel, so did the responses of central banks. The Fed moved first and moved very quickly, starting a hike cycle at the fastest pace since the 1980s: it went from a 25 basis point hike in March to a 75 basis point hike in June. The inflationary and geopolitical situation led to heavy losses on the equity, credit and interest rate markets, with credit spreads returning to levels

comparable to those of the first quarter of 2020 and equity indices recording losses of more than 20%.

In this difficult context, the manager preferred to keep the asset allocation of the sub-fund in line with the benchmark. After months of almost constant increases, the trend in consumer price indices in the United States and Europe reversed in the fourth quarter. This led the Central Banks to slow down the process of normalizing monetary policy, going from hikes of 75 bps to 50 bps during their December meetings.

However, the tones of Powell and Lagarde remained tough: to maintain the credibility of their institutions, they reiterated during the last meeting that, albeit at a more moderate pace, the increases will continue until there is convincing evidence that the inflation has returned under control, paying particular attention to the dynamics of the labor market.

The markets recorded positive performances in the quarter, especially in November, to then correct their course after the December meetings of the Fed and ECB The manager continued to maintain implemented risk exposures for most of the year.

New Millennium - Total Return Flexible

The sub-fund closed the year with a NAV of 97.95 and a performance of -6.93% (Class I).

Inflation and monetary policy were the main market themes in 2022. Central banks have shown growing concerns about the rise in consumer price indices, changing their view on inflation and starting to fear harsh countermeasures since the first weeks of the year. The situation was further exacerbated by the sudden Russian invasion of Ukraine on February 24th. The sanctions promptly imposed by Europe and the United States in response have led to a significant increase in the price of energy raw materials exported by Russia, especially natural gas.

The inflationary spiral intensified in the second quarter and, in parallel, so did the responses of central banks. The Fed moved first and moved very quickly, starting a hike cycle at the fastest pace since the 1980s: it went from a 25 basis point hike in March to a 75 basis point hike in June. The inflationary and geopolitical situation led to heavy losses on the equity, credit and interest rate markets, with credit spreads returning to levels comparable to those of the first quarter of 2020 and equity indices recording losses of more than 20%.

In the first half of the year, the manager maintained the equity exposure at the start of the year and optimized the bond component, taking positions on European banking issuers and purchasing securities with a high credit rating. In addition, after the start of the war, he increased exposure to the oil sector on the equity component. Over the summer months, with regards to equity exposure, the manager built a tactical position on the US tech sector, taking profits on the oil component of the portfolio and increasing exposure to the US dollar. All this without significantly changing the portfolio's exposures. After months of almost constant increases, the trend in consumer price indices in the United States and Europe reversed in the fourth quarter.

This led the Central Banks to slow down the process of normalizing monetary policy, going from hikes of 75 bps to 50 bps during their December meetings. However, the tones of Powell and Lagarde remained tough: to maintain the credibility of their institutions, they reiterated during the last meeting that, albeit at a more moderate pace, the increases will continue until there is convincing evidence that the inflation has returned under control, paying particular attention to the dynamics of the labor market.

The markets recorded positive performances in the quarter, especially in November, to then correct their course after the December meetings of the Fed and ECB In the fourth quarter, the manager reduced the weight of the equity component, taking profit on the market rebound, and continued to replace the maturing bond component with securities with an average duration not exceeding 2-3 years and with a risk/return ratio deemed interesting.

Investments Manager: Open Capital SGR

New Millennium - Multi Asset Opportunity

The sub-fund closed the year with a NAV of 101.03 and a performance of -8.93% (Class I).

2022 will be remembered as one of the worst years in terms of financial market performance in recent decades for almost all sectors, with the exception of commodities pushed up by inflation and the outbreak of war in Ukraine. Equities saw the United States losing around 18%, Europe 8.5% and China 19%, the latter also weighed down by the difficulties in managing the zero-Covid policy and by the continuation of the crisis domestic real estate market. Bonds, as mentioned, recorded widespread losses that they hadn't experienced for more than forty years: government bonds lost around 18%, corporate 16% and emerging debt 15%.

Precisely, high inflation is one of the main causes capable of explaining double-digit negative changes in both the bond and equity component. The change of course of the monetary policies of the main developed countries and the beginning of an aggressive path of restrictive policy with significant and continuous rate hikes, necessary to counter inflation close to 10%, have generated a flight from bonds and a revaluation of corporate multiples also in the light of a possible recession of the global economy.

From the point of view of the bond market, the sub-fund has tended to have a lower exposure to government securities than that of the benchmark, preferring those with returns parameterized to inflation or with reduced duration precisely to minimize the sensitivity of this part of the portfolio to movements in taxi. As regards the portion of the portfolio exposed to corporate issuers, it was decided to focus attention on issuers with a high rating, but on instruments with a lower degree of subordination having a shorter duration and a higher yield. With regard to the equity sector, the Sicav was on average underexposed to equity compared to the benchmark in the first part of the year and then progressively increased its weight after the summer and closed the year with an overexposure both to European equity and the global one.

Investments Manager: Diaman Partners Ltd

New Millennium - VolActive

The sub-fund closed the year with a NAV of 93.42 and a performance of -15.78% (Class I).

The Asset Allocation was composed on average of approximately 56% in Government bonds, 31% in Corporate bonds and 3% in Equity.

The 92% of the selected bonds are classified as Investment Grade. The bond component, characterized by a duration of around 3 years, had the greatest impact on the annual performance. The rise in interest rates has generated a significant increase in the yield to maturity.

The portfolio moved from a YTM of +0.70% in January to +2.96% at the end of December. The equity component, made up of large cap stocks from the Eurozone, had a marginal impact given its low weight. In 2022 the VIX index went from 17.22 to 21.67 recording a nervous trend, with many small spikes.

The index has touched 35 4 times. Since there is no stable trend and a well-defined Contango/Backwardation, the models have alternated the various Long/Short/Neutral phases very often, generating false signals and impacting the negative performance of the fund.

Over the year, models were positioned short 48% of the time, 29% long and 30% neutral.

4. PROMOTION OF ENVIRONMENTAL OR SOCIAL CHARACTERISTICS

The following sub-funds promote environmental or social characteristics, according to Article 8 of the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector ("SFDR"): NEW MILLENNIUM - Euro Equities, NEW MILLENNIUM - Global Equities (Eur Hedged), NEW MILLENNIUM - Euro Bonds Short Term, NEW MILLENNIUM - Large Europe Corporate, NEW MILLENNIUM - Balanced World Conservative, NEW MILLENNIUM

- Inflation Linked Bond Europe and NEW MILLENNIUM - PIR Bilanciato Sistema Italia.

The remaining sub-funds do not take sustainability criteria into account as part of the investment process (Article 6 SFDR) nor has sustainable investment as their objective (Article 9 SFDR).

For the sub-funds which are not categorized under Article 6 SFDR, the annex referred to Article 11 SFDR is disclosed in the unaudited appendix – Section 3.

Mr. Sante JANNONI

Luxembourg, 30 March 2023

Chairman of the Board of Directors

The information stated in the report is historical and is not representative of future results.

Audit report

To the Shareholders of **New Millennium**

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of New Millennium (the "Fund") and of each of its sub-funds as at 31 December 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 December 2022:
- the combined statement of operations and changes in net assets for the Fund and the statement of operations and changes in net assets for each of the sub-funds for the year then ended;
- the portfolio as at 31 December 2022; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
 a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the
 disclosures, and whether the financial statements represent the underlying transactions and events
 in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

NOTES TO THE FINANCIAL STATEMENTS AS AT 31 DECEMBER 2022

1. GENERAL INFORMATION

NEW MILLENNIUM, referred to hereafter as the "Fund", is a Luxembourg investment company (Société d'investissement à capital variable) incorporated for an unlimited duration in Luxembourg on 11 August 1999 and organised under Part I of the Luxembourg Law of 17 December 2010 on undertakings for collective investment (the "Law of 17 December 2010"), as amended, and the Law of 10 August 1915 on commercial companies as amended on 10 December 2010.

The Fund is composed of different Sub-Funds, each one with its own assets and managed according to a specified investment policy.

Effective from the 1 January 2017 the Fund has appointed Natam Management Company 5.A. as Management Company of the fund.

The Fund's aim is to offer its shareholders easy access to various transferable securities whilst adhering to the principle of risk spreading. Nearly all transferable securities purchased are listed on an official stock exchange or traded on a regulated market that operates regularly and is recognised and open to the public.

The following Sub-Funds were offered to investors as at 31 December 2022:

NEW MILLENNIUM - Augustum Corporate Bond

NEW MILLENNIUM - Euro Equities

NEW MILLENNIUM - Global Equities (Eur Hedged)

NEW MILLENNIUM - Euro Bonds Short Term

NEW MILLENNIUM - Augustum High Quality Bond

NEW MILLENNIUM - Large Europe Corporate

NEW MILLENNIUM - Balanced World Conservative

NEW MILLENNIUM - Total Return Flexible

NEW MILLENNIUM - Inflation Linked Bond Europe

NEW MILLENNIUM - Augustum Italian Diversified Bond

NEW MILLENNIUM - Augustum Market Timing

NEW MILLENNIUM - VolActive

NEW MILLENNIUM - Augustum Extra Euro High Quality Bond

NEW MILLENNIUM - Evergreen Global High Yield Bond

NEW MILLENNIUM - Multi Asset Opportunity

NEW MILLENNIUM - PIR Bilanciato Sistema Italia

A copy of the prospectus may be obtained free of charge, upon request, at the Funds registered office.

2. SUMMARY OF MAIN ACCOUNTING POLICIES

The Fund keeps the books of each Sub-Fund in its respective currency and the financial statements were prepared in EUR in accordance with the Luxembourg regulations relating to undertakings for collective investment and in particular using the following valuation rules:

a) Valuation of investment securities

Investment securities, including zero-coupon bonds and money market instruments, quoted on an official stock exchange or on another regulated market are valued according to the last known price and, in the event of being quoted on several markets, according to the last known price of the principal market.

Valuation of investment securities, including zero-coupon bonds and money market instruments, not quoted on an official stock exchange or on another regulated market is fixed in a reasonable way on the basis of the sale prices anticipated cautiously, determined prudently and in good faith.

The value of each investment in open-ended funds, either listed or not, is based on the last known Net Asset Value on the Valuation Day.

In the absence of an active market for financial instruments, then the valuation will be made by reference to alternative methods such as approaching a broker for a quote, or applying any other ad hoc analysis judged relevant by the Management Company.

b) Net realised profit (loss) on sale of investments

Realised profits or losses made on the sales of investments are calculated according to the average cost.

c) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at forward foreign exchange rate for the remaining period to run until maturity at the date of valuation.

Unrealised profits and losses are recorded in the Statement of Net Assets and their variations recorded in the Statement of Operations and Changes in Net Assets under the heading «Change in unrealised appreciation / (depreciation) on forward foreign exchange contracts».

d) Futures contracts

Commitments related to futures contracts are recorded off balance sheet and futures contracts are valued according to the last available contract price. Unrealised profits and losses on futures contracts are recorded in the Statement of Net Assets and their variations recorded in the Statement of Operations and Changes in Net Assets under the heading «Change in unrealised appreciation / (depreciation) on futures contracts». Guarantee deposits are booked under the heading «Amounts due from brokers» and «Amounts due to brokers».

e) Option contracts

Options quoted on an official stock exchange or on another regulated market are valued according to the last known market price or, if there are several markets, according to the last known price of the principal market.

Options not quoted on an official stock exchange or on another regulated market are valued at their last known market value or, in the absence of a market value, according to their probable market value in the reasonable estimation of the Board of Directors of the Fund.

Premiums received on the writing of option contracts are recorded as liabilities and premiums paid on purchased of option contracts are recorded as assets. Unrealised gains and losses are recorded in the Statement of Net Assets and their variations in the Statement of Operations and Changes in Net Assets under the heading «Change in unrealised appreciation / (depreciation) on option contracts».

f) Swap contracts

Swaps are valued at their fair value based on the underlying securities as well as on the characteristics of the underlying commitments or otherwise in accordance with usual accounting practices.

Upfront payments, which represent a risk premium of Credit Default Swaps, are recorded in the Statement of Net Assets under the heading "swap premium received". This payable amount is related to the amount of cash received to compensate the difference between the market value of the Credit Default Swaps and the entry proceeds.

The market value of Credit Default Swaps is calculated as the sum of the swap premium received and the unrealized profit/(loss) recorded in the Swap Contracts section.

g) Cost of purchase of securities in portfolios

For securities in currencies other than the base currency of the Sub-Fund, the purchase price is calculated according to the closing exchange rate on the day of purchase.

h) Income

Dividends are recognised on the date on which the Shares/Units concerned are quoted «exdividend», net of withholding tax. Interest is calculated on a prorata temporis basis, net of withholding tax.

i) Translation of items expressed in foreign currencies

Assets and liabilities in foreign currencies are converted into the base currency of the Sub-Fund at the closing exchange rate on the final day of the financial year.

Income and expenses in currencies other than the base currency of the Sub-Fund are converted into the currency of the Sub-Fund at the closing exchange rate in force on the day of the transaction.

Any resulting gain or loss made on foreign exchange is included in the Statement of Operations and Changes in Net Assets.

j) Net Asset Value per Share

The Net Asset Value of each Sub-Fund is equal to the difference between the total assets and the liabilities of the Sub-Fund.

The Net Asset Value per Share is calculated by dividing the net asset value by the number of Shares outstanding on the day of calculation.

k) Presentation of the Financial Statements

The financial statements are presented on the basis of the last Net Asset Value (NAV) of the year. In accordance with the prospectus, the NAVs have been calculated on the basis of the last market price available at the time the calculation was performed.

I) Exchange Rates

The main exchange rates as at 31 December 2022:

```
1 EUR = 1.573766 AUD
1 EUR = 5.634811 BRL
1 EUR = 1.446070 CAD
1 EUR = 0.987419 CHF
1 EUR = 7.419199 CNY
1 EUR = 7.436435 DKK
1 EUR = 0.887230 GBP
1 EUR = 8.329829 HKD
1 EUR = 16614.41 IDR
1 EUR = 88.29355 INR
1 EUR = 151.5014 ISK
1 EUR = 140.8182 JPY
1 EUR = 20.79776 MXN
1 EUR = 2.203710 NLG
1 EUR = 10.51348 NOK
1 EUR = 1.687485 NZD
1 EUR = 59.47515 PHP
1 EUR = 4.681223 PLN
1 EUR = 77.90922 RUB
1 EUR = 11.12021 SEK
1 EUR = 1,431395 SGD
1 EUR = 19.97838 TRY
1 EUR = 1.067250 USD
1 EUR = 18.15925 ZAR
```

m) Cross-Investments

The combined financial statements show a total net asset value of EUR 852,729,839.27. At the end of the year, the Sub-Fund NEW MILLENNIUM - Augustum Market Timing invested a total amount of EUR 1,610,550.42 in other Sub-Funds of the umbrella NEW MILLENNIUM. If those investments are excluded from the combined financial statements, the total net asset value for the Fund would be EUR 851,119,288.85.

3. TAXATION

The Fund is governed by Luxembourg tax laws applicable to investment funds.

As legislation now stands, the Fund is subject to a Luxembourg subscription tax at an annual rate of 0,05% calculated and payable quarterly on the Net Asset Value of each Sub-Fund at the end of each quarter in question.

The rate of the annual subscription tax is fixed at 0,01% for the Sub-Funds or Classes of Shares, if the Shares in these Sub-Funds or Classes are reserved for one or more Institutional Investors, as well as for Sub-Funds whose exclusive aim is the collective investment in money market instruments and/or deposits with credit institutions.

The value of the assets represented by Shares held in other UCIs shall be exempt from the subscription tax, provided such UCIs have already been subject to the subscription tax.

4. OTHER CHARGES AND TAXES

Registration fees payable to the Authority of Control and other professional fees (domiciliary, distribution, paying administrator and miscellaneous) are divided amongst the various Sub-Funds in proportion to the Net Asset Value of each Sub-Fund.

The following table shows the breakdown of "Other charges and taxes" when this amount exceeds 10% of the total expenses of the Sub-Fund:

| Sub-Fund | Distribution fees | Reporting fees | Investment payables | Placing Agent | Authority | Co Sponship | Miscellaneous fees | Total |
|---|-------------------|----------------|---------------------|------------------|-----------|----------------|-----------------------|-----------|
| NEW MILLENNIUM - Euro Bonds Short Term | 0.00 | 6,347.19 | 0.00 | 1,891.77 | 1,221.29 | 610.32 | 4,346.89 | 14,417.46 |
| NEW MILLENNIUM - Total Return Flexible | 0.00 | 3,323.69 | 71.67 | 2,678.52 | 1,101.92 | 841.82 | 27,578.87 | 35,596.49 |
| NEW MILLENNIUM - Augustum Market Timing | 26,358.39 | 6,087.94 | 0.00 | 615.00 | 1,155.78 | 178.93 | 3,841.09 | 38,237_13 |
| NEW MILLENNIUM - Evergreen Global High Yield Bond | 0.00 | 5,600.12 | 0.00 | 362.94 | 1,238.41 | 94.28 | 3,751.86 | 11,047.61 |

The above miscellaneous fees are composed of: license fees, contributions fees, regulatory fess and listing fees.

5. MANAGEMENT FEES

The Investment Advisor, the Management Company and Sub-Fund Co-Manager, as remuneration for their services, are entitled to receive a proportion of the management fee calculated according to the Net Asset Value of each Sub-Fund of the Fund. As at 31 December 2022, the rates currently in force for each Sub-Fund are the following:

| Annual | management | fee rate | by | Share | Class: |
|---------|------------|----------|----|-------|--------|
| A /U CU | | | | | |

In each Sub-Fund of the Fund, this fee is payable quarterly and calculated on the basis of the average Net Asset Value during the relevant quarter.

Besides this, the Sub-Fund NEW MILLENNIUM - Augustum Market Timing pays a distribution fee at an annual rate of 1% on the Share classes A and D. This fee is payable quarterly to the Distributors and calculated and accrued on a daily basis with reference to the Net Asset Value.

In addition as at 31 December 2022, the Sub-Fund NEW MILLENNIUM - Augustum Market Timing is investing more than 50% in UCI Shares. In respect of a Sub-fund's substantial investments in UCITS and other UCIs linked to the Fund, or other sub-funds within the SICAV, the total management fee (excluding any performance fee, if any) charged to such Sub-Fund and each of the UCITS or other UCIs concerned shall not exceed 2% of the relevant net assets under management. The percentage of management fees charged at the level of these UCI Shares are the following:

| UCI Shares | Management Fee |
|--|----------------|
| AZ FUND 1 - AZ ALLOCATION INTERNATIONAL 50%-100% | 1.50% |
| AZ FUND 1 - AZ BOND TARGET 2021 -AAZ- | 1.20% |
| AZ FUND 1 - AZ BOND GLOBAL MACRO -AI- | 1.20% |
| NEW MILLENNIUM - AUGUSTUM EXTRA EURO HIGH QUALITY BOND -I- | 0.80% |
| NEW MILLENNIUM - AUGUSTUM CORPORATE BOND -I- | 0.75% |
| NEW MILLENNIUM - AUGUSTUM ITALIAN DIVERSIFIED BOND -I- | 0.75% |
| NEW MILLENNIUM - AUGUSTUM HIGH QUALITY BOND -I- | 0.70% |

6. ADVISORY FEE

The advisory fee includes the 11,000 Eur for rent of compartment and ancillary fee.

7. PERFORMANCE FEES

The performance fee is detailed for each Sub-fund, when applicable, in the Statement of Operations and Changes in the net assets.

A performance-based fee, as detailed below, shall be paid as follows:

a) For Sub-Funds with absolute performance fee:

The performance fee will be based on the difference, if positive, between the last computed GAV (Gross Asset Value or net asset value per share before deduction of performance fees) as at the end of a 12 month period, starting the 1 January of each year, and the highest net asset value per share calculated as at the end of any preceding calendar year and giving rise to the payment of a performance fee, since the first period, or the first net asset value of the first period subject to a performance fee calculation. The performance fee shall be a percentage, indicated below, of the difference so determined multiplied by the number of shares in circulation of the Sub-Fund.

| Absolute performance fee | Percentage |
|--|------------|
| NEW MILLENNIUM - Augustum Corporate Bond | 10% |
| NEW MILLENNIUM - Augustum High Quality Bond | 7.50% |
| NEW MILLENNIUM - Augustum Italian Diversified Bond | 10% |
| NEW MILLENNIUM - Augustum Market Timing | 10% |

b) For Sub-Funds with relative performance fee:

For the Sub-Funds:

NEW MILLENNIUM - Augustum Extra Euro High quality Bond NEW MILLENNIUM - Evergreen Global High Yield Bond

The performance fee shall be a percentage, indicated below, of the excess return over the relevant benchmark below. The performance fees are submitted to the occurrence of the following conditions:

- GAV of the Sub-Fund is above HWM (High Water Mark)
- In the calendar year the performance of the Sub-Fund is positive and higher than the performance of the benchmark.

Once verified the above two conditions, a double scenario can raise:

a) HWM is equal or higher than the NAV as at the end of the previous calendar year: the accrual will be calculated on the difference between the performance of the Sub-Fund and the performance of the benchmark starting on the date the HWM has been beaten. For the Sub-Fund it will be calculated the difference between the GAV and the HWM, for the benchmark it will be calculated the difference between the daily value and the closing price of the day before that on which the HWM was beaten (i.e. if the HWM is beaten on the 20 April, the performance of the benchmark to be considered on the 20 April is the one between the 20 and the 19 April).

b) HWM is lower than the NAV as at the end of the previous calendar year: the accrual will be calculated on the difference between the performance of the Sub-Fund and the performance of the benchmark over the current year.

For the Sub-Funds:

NEW MILLENNIUM - Euro Equities

NEW MILLENNIUM - Global Equities (Eur Hedged)

NEW MILLENNIUM - Euro Bonds Short Term

NEW MILLENNIUM - Inflation Linked Bond Europe

NEW MILLENNIUM - Large Europe Corporate

NEW MILLENNIUM - Balanced World Conservative

NEW MILLENNIUM - Total Return Flexible

NEW MILLENNIUM - VolActive

NEW MILLENNIUM - Multi Asset Opportunity

NEW MILLENNIUM - PIR Bilanciato Sistema Italia

The performance fees shall be calculated on each Net Asset Value calculation and payable annually as of the 31 December to the Management Company and Investment Manager or Investment Advisor (if any) at the beginning of the following year.

The Fund will apply at all times the High Water Mark Principle, i.e. no performance fee shall be paid in the case where the Gross Asset Value (the "GAV") which is the Net asset value per share after deducting all fees and liabilities and the management fee (but not the performance fee) as at the end of the calendar year is lower than the highest Net asset value per share calculated as at the end of any preceding period (calendar year) and giving rise to the payment of a performance fee since the first period, or the first Net asset value per share of the first period in which a performance fee was calculated ("High-Water Mark"). The "Performance Reference Period" is considered the whole life of the Fund.

The performances of the Shares are calculated considering the reinvestment of dividends, if any. The performance fee rate shall be a percentage, indicated below, of the excess return over the relevant benchmark/target below.

The performance fee is applied to the smallest value between the total net assets of the Sub-Fund at the calculation day and the average total net Assets of the Sub-Fund during the calendar year. The performance fees are submitted to the occurrence of the following conditions:

- GAV of the Sub-Fund is above HWM
- In the calendar year the performance of the Sub-Fund is positive and higher than the performance of the benchmark/target.

Once verified the above two conditions, a double scenario can raise:

a) HWM is equal or higher than the NAV as at the end of the previous year: the accrual will be calculated on the difference between the performance of the Sub-Fund and the performance of the benchmark/target starting on the date the HWM has been beaten. For the Sub-Fund it will be calculated the difference between the GAV and the HWM, for the benchmark/target it will be calculated the difference between the daily value and the closing price of the day before that on which the HWM was beaten (i.e. if the HWM is beaten on the 20 April, the performance of the benchmark to be considered on the 20 April is the one between the 20 and the 19 April);

b) HWM is lower than the NAV as at the end of the previous year: the accrual will be calculated on the difference between the performance of the Sub-Fund and the performance of the benchmark/target over the current year.

|---|------------|--------------------|----------|-------------------|
| NEW MILLENNIUM - Augustum Corporate Bond | Z | 0.76 | EUR | 119,328.70 |

Russia-Ukraine crisis:

Tensions persist between Russia and Ukraine. Much of the international community has responded by imposing economic sanctions against Russian persons (individuals and entities) which have been tightened over the months. The financial markets have experienced and could continue to experience significant volatility. Securities issued by Russian entities and/or denominated in rubles have suffered sharp declines in value as well as trading restrictions. Some of the managed sub-funds hold such securities: when the issuer and the security are subject to a sanction, a total write-off has been applied, in other cases the security has been valued at fair value according the decision of the Board of Directors. The Company has put in place through the activity of NATAM and its delegates, the appropriate measure to ensure risk monitoring, sanctions and anti-money laundering.

Share class closed during the year:

NEW MILLENNIUM - Augustum High Quality Bond Class A (H-CHF) has been closed on 1 August 2022

15. SUBSEQUENT EVENTS

Subsequent to year end, Silicon Valley Bank, a Californian bank specializing in financing tech startups, went bankrupt, triggering a crisis that led to the closure of another American bank, Signature Bank, and the acquisition of SVB's UK branch by HSBC.

Even if a contagious effect was excluded, the common factor of raising interest rates impacted Credit Suisse bank which accumulated a number of problems over time like managerial deficiencies, balance sheets at loss and finally the decision of his biggest shareholder (Saudi National Bank) to refrain from providing new financial support.

On the following days of significant turmoil in the global financial markets, Swiss Central Bank's announced a loan to Credit Suisse and Swiss regulator FINMA allowed the negotiation of merger between UBS and Credit Suisse wiping out \$17 billion worth of additional tier-one bonds.

New Millennium Sicav is not exposed to SVB and Signature Bank.

Some sub-funds of New Millennium SICAV hold Credit Suisse senior bonds (no impact from the wipe out).

NATAM Management Company S.A continues to monitor the situation and assess the implications on the operations of the New Millenium SICAV.

UNAUDITED APPENDIX

1. GLOBAL EXPOSURE AND EXPECTED LEVEL OF LEVERAGE

As part of the Risk Management Process, the global exposure is measured and controlled by the VAR approach.

The VAR is determined on the basis of 99% confidence interval and a holding period of 1 month by Montecarlo method.

2. REMUNERATION POLICY

2.1 Board of Directors of NEW MILLENNIUM SICAV (the "SICAV")

The members of the Board of Directors of the SICAV are reimbursed their out-of-pocket expenses and are entitled to receive an annual remuneration (payable on a semiannual basis on arrear), as set by the Annual General Meeting of Shareholders. The Annual General Meeting of Shareholders of the SICAV, held on 21 April 2022, for the exercise 2022, approved a remuneration up to EUR 25,000 (excluding TVA) for each Director.

2.2 NATAM Management Company S.A. (the MANCO)

The Remuneration Policy of the MANCO in charge of the management of the SICAV is aimed at ensuring the best possible alignment of the interest of the investors of the SICAV. The Remuneration Policy covers the remuneration of the following persons of the Management Company (together the "Identified Staff"):

- individuals who are members of the governing bodies,
- senior managers,
- risk takers and control functions,
- any employees receiving any type of remuneration that takes them into the same remuneration bracket as senior management and risk takers;

In compliance with current laws and regulations (such as Directive 2011/61/EU, Directive 2014/91/EU, Annex II of the Luxembourg Law 12th July 2012, CSSF Circular 18/698, and 10/437, ESMA Guidelines 2016/411)), the MANCO has adopted for those categories of persons certain remuneration principles that are consistent with and promote sound and effective risk management and do not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the managed Sub-funds.

The policy is also in line with the business strategy, objectives, values and long-term interests of the managed Sub-funds and is consistent with the principles relating to the protection of investors in the course of activities provided and the avoidance of conflict of interest as a result of the implementation of the said strategy.

The following principles shall apply to remuneration of any type paid by the SICAV, to any amount paid directly by the MANCO itself and to any transfer of shares of the SICAV, made to the benefits of identified categories of staff.

2.2.1 Responsible Person

The remuneration policy is defined by the Board of Directors of the MANCO and validated by the general meeting of shareholders. The Board of the MANCO is responsible for the implementation of the remuneration procedure, the General Manager of the MANCO must control that the procedure is respected and must notify the Board and the Remuneration Committee of the Parent Company (BANCA FINNAT EURAMERICA S.p.A.) for any breach or violation they should be aware during the normal course of their assessment procedure.

2.2.2 Supervision and revision of the Remuneration Policy

Any decision made in relation with the remuneration of the staff will be specifically documented. The implementation of the remuneration policy will be reviewed at least annually by the Internal Auditor and its compliance with Luxembourg legal requirements will also be reassessed regularly by the Compliance function. Any finding or need for update identified by one of these functions will be directly reported to the BoD action. In the implementation and supervision of the remuneration any event, circumstances or indication that may give rise to a potential risk of conflict of interest will be specifically documented. Any change or update of the policy will be submitted to the BoD for approval.

2.2.3 Remuneration components and proportionality principle

The MANCO may pay to the identified staff fixed and variable remuneration according to the procedures set out hereafter. In addition to the negotiated fixed remuneration, the MANCO may offer to its employees various optional advantages (e.g. company car, cell phone, ticket restaurant, car park). In light of its size, the internal organization, the nature, scope and complexity of the activities, the MANCO assesses that proportionality principle may apply to its remuneration framework and in light of the above, the MANCO shall in particular disapply the following rules:

- Set-up of an Internal Remuneration Committee
- The payment of variable remuneration in instruments related mainly to the Funds managed
- Deferral requirements
- Retention periods
- Ex-post incorporation of risk (Malus)

2.2.4 Fixed Remuneration

The members of the Board of the MANCO are entitled to receive a cumulative an annual gross remuneration of Eur 55.000, empowering the Board to allocate this remuneration on the basis of the criteria established by the same board.

The fixed remuneration of the Senior Managers and of the staff is negotiated at the beginning of the relation with the MANCO, based on the individual role, including responsibility, job complexity, performance and local market conditions. Fixed remuneration can be reviewed annually in the contest of an annual performance assessment of the employees.

2.2.5 Variable remuneration

The MANCO may to pay a variable remuneration ("the Bonus") to better gain the manager and employee loyalty, in the long term perspective, sharing with them the corporate goals. According to the directives of the Sole Shareholder, Banca Finnat Euramerica S.p.A, the MANCO has foreseen to the possibility to pay the Bonus to the achievement of certain corporate financial results (determinated as net of the tax and before the calculation of the Bonus) taking into consideration the following elements:

- the payment of the Bonus mainly, but not only, concerns the key persons (considering the direct impact of their personal job performance with the global performance of the company);
- as the business model of the MANCO does not foresee the service of portfolio management on day to day
 basis (in fact the services provided by the MANCO to its clients only encompass the duties of risk monitoring
 and oversight on the delegated functions) and does not distribute directly its own funds (the distribution
 activity in each jurisdiction where the funds are duly notified according to the relevant rules and regulations, is
 always delegated to local distributors through an appointed Main Distributor), the staff of the MANCO does
 not include any employees (such as the "investment managers" or "funds sellers") whose personal
 performances may have been valued in relation to those of the managed funds.

Bonus can be only in the form of cash. In accordance with Par. 8 ESMA Guidelines 2016/411, despite the MANCO being part of a credit institution group ("BFE Group"), the MANCO shall adopt the group remuneration guidelines to the extent that such policies do not conflict with the sectorial guidelines applicable to management companies.

2.2.6 Remuneration of the delegated charged of the Portfolio Management function

The business model adopted by the MANCO foresees the delegation of the portfolio management function. When delegating the portfolio management function, the MANCO will check, during the initial and ongoing due diligence performed on yearly basis, according with the rules set in its Due Diligence Procedure that these delegated entities should be subject to regulatory requirements on remuneration that are equally as effective as those applicable to the MANCO and appropriate contractual arrangements should be put in place in order to ensure that there is no circumvention of the remuneration rules.

2.2.7 Remuneration payed during the year 2022 at the delegated Portfolio Manager level

The following table shown the cumulative remuneration payed at the portfolio managers' level, during the year 2022. The amounts are broken down in consideration of different component (Fixed and Variable component).

3. SUSTAINABLE FINANCE DISCLOSURE REGULATION (SFDR)

In accordance with article 2 of the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), sustainability risk is defined as an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment. The impact of environmental, social and governance factors on the value of an investment may vary depending not only on its business activities (e.g. asset type, the sector, size, geographic location and the stage in the life cycle, and liabilities) but also on the governance and strategy of the company for managing them.

In accordance with article 3 of the Disclosure Regulation, sustainability risks are integrated in the investment decision-making process of the Fund. The risk assessments and investment decisions are based on internal and external research and assessments on sustainability factors and sustainability risks.

At the present the Fund does not consider "principal adverse impacts" of investment decisions on sustainability factors.

Sub-Funds categorised under Art. 8 SFDR

The following Sub-funds promote environmental or social characteristics, according to Article 8 SFDR: NEW MILLENNIUM - Euro Equities, NEW MILLENNIUM - Global Equities (Eur Hedged), NEW MILLENNIUM - Euro Bonds Short Term, NEW MILLENNIUM - Large Europe Corporate, NEW MILLENNIUM - Balanced World Conservative, NEW MILLENNIUM - Inflation Linked Bond Europe and NEW MILLENNIUM - PIR Bilanciato Sistema Italia. The annex referred to Article 11 SFDR is disclosed in Annex IV.

Sub-Funds categorised under Art. 6 SFDR

The remaining Sub-Funds do not fall under article 8 SFDR (promoting sustainability objectives) or article 9 SFDR (sustainable investments): they do not take sustainability criteria into account as part of its investment process, do not promote ESG features and do not haves as objective sustainable investment. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

4. SECURITIES FINANCING TRANSACTIONS REGULATION

The Securities Financing Transaction Regulation (SFTR) 2015/2365 on transparency of securities financing transactions and of reuse came into force on 12 January 2016 and introduces new disclosure requirements for securities financing transactions and total return swaps.

A securities financing transaction is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement,
- securities or commodities lending and securities or commodities borrowing,
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction.

Total Return Swaps

No collateral has been received for total return swaps.

All the returns of the total return swaps are attributed to the Sub-Funds. The transaction costs are not separately identifiable.

Transactions in total return swaps are bilateral trades.

The following summarises the aggregate value of total return swaps, analysed by counterparty as at 31 December 2022:

| Sub-Funds | Currency | Counterparty | Counterparty's country of incorporation | Total Return Swaps | % of Net Assets |
|--|----------|----------------|---|--------------------------|--------------------|
| | | (Ab | solute values in EUF | ?) | |
| NEW MILLENNIUM - Augustum Corporate Bond | EUR | J.P. Morgan SE | Germany | 236,175.43 | 0.08 |

The following table details provide an analysis of the maturity tenor of total return swaps transactions outstanding as at 31 December 2022:

| Sub-Funds | Currency | 1 day | 2 to 7 days | 8 to 30 days | 31 to 90 days | 91 to 365 days | More than 365 days | 4,7122 |
|---|----------|-------|----------------|-----------------|------------------|-------------------|--------------------------|------------|
| | | | | (Absolute v | alues in EU | R) | - | |
| NEW MILLENNIUM - Augustum Corporate Bond | EUR | | | | 236,175.43 | | | 236,175.43 |

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: NEW MILLENNIUM SICAV – EURO EQUITIES **Legal entity identifier:** 2138003KBIVA46LVO204

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes × No It made **sustainable** It promoted Environmental/Social (E/S) investments with an characteristics and while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally sustainable under the EU with an environmental objective in economic activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not Χ make any sustainable investments with a social objective: %

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be

aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promotes ESG business practice investing mainly in financial securities issued by companies having formally declared the adoption of virtuous corporate policies, i.e. codes of conduct and policies respecting human rights, protection of child work and environment, appropriate internal risk management and distribution structures, clear policies of tax strategy.

Moreover, the following circumstances have contributed to the promotion of environmental and social characteristics:

- stringent constraints imposed on the portfolio manager who is forced to be significantly orientated towards investments in companies characterized by high ESG ratings, attributed by leading ESG rating providers;
- the substantial exclusion of investments in controversial sectors and activities;
- the incentive to invest in financial instruments that promote environmental and social characteristics (Green bonds and Social bonds).

How did the sustainability indicators perform?

The *average portfolio ESG Rating* of this financial instrument should be equal or greater than 65. With reference to year 2022, the monthly assessment of this indicator registered:

- Minimum: 78.80

Maximum: 82.50

Average: 81.18

31st December 2022: 81.50

... and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Not applicable

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

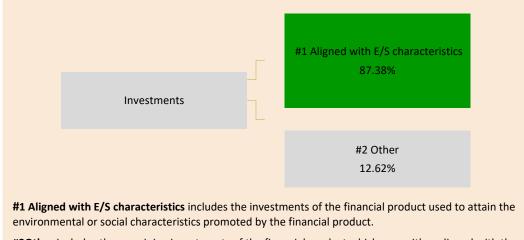

comprehensive

safety and waste management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the proportion of sustainability-related investments?

What was the asset allocation?

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The asset allocation may vary over time, in compliance with the investment restrictions indicated by the investment policy set out in the Prospectus. Although the minimum proportion of investments aligned with E/S characteristics envisaged for the financial product is 68%, this amounted to 87.38% as at 31st December 2022.

The residual proportion of investments included:

- ancillary liquid assets;
- other securities for which the ESG rating is in the worst quartile or for which the ESG rating is not available or cannot be calculated, therefore an ESG rating of zero is prudently assigned;
- UCI which are not classified as Article 8 or 9 under SFDR (Regulation EU 2019/2088), but may reasonably also include investments in securities that promote E/S characteristics.

In which economic sectors were the investments made?

The investments aligned with E/S characteristics are mainly related to the manufacturing sector, but also energy supply, information and communication, financial and insurance activities sector.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product promotes environmental characteristics but does not aim at investing in environmentally sustainable economic activities. Therefore, the investments underlying the financial product do not take into account the EU criteria for eco-sustainable economic activities, pursuant to the Taxonomy Regulation.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

| | Yes: | | |
|---|------|---------------|-------------------|
| | | In fossil gas | In nuclear energy |
| X | No | | |

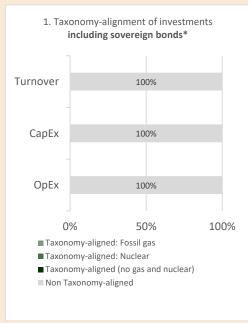

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

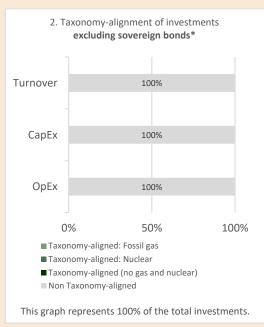

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

As the Fund did not commit to invest in any sustainable investment within the meaning of the EU Taxonomy, the minimum share of investment in transitional and enabling activities within the meaning of the EU Taxonomy has also been 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The residual proportion of investments includes:

- ancillary liquid assets;
- other securities for which the ESG rating is in the worst quartile or for which the ESG rating is not available or cannot be calculated, therefore an ESG rating of zero is prudently assigned, even though these activities may actually satisfy partially or totally the E/S and/or taxonomy criteria:
- UCI which are not classified as Article 8 or 9 under SFDR (Regulation EU 2019/2088), but may reasonably also include investments in securities that promote E/S characteristics.

Derivatives were not used to promote environmental and social characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The financial product has integrated ESG aspects into the investment process through:

- the improvement of the overall sustainability of the portfolio, by calculating an average ESG rating of the portfolio according to the methodology reported in the "ESG integration" practices section of the Prospectus and on the website of the management company and of the financial product;
- the strict definition of specific binding elements used to select the investments to which the investments must comply. They concern, *inter alia*:
- the monitoring of the quality of the corporate issuers, preferring those who have formally declared the adoption of corporate policies on respect of human rights, protection of child labor, respect for the environment;
- the compliance with a minimum investment in financial instruments with a very high ESG rating;
- the restriction to a maximum amount of investment in instruments without or with a low ESG rating;
- the application of the exclusion criteria.

How did this financial product perform compared to the reference benchmark?

Not applicable

Yes No It made **sustainable** It promoted Environmental/Social (E/S) investments with an **characteristics** and while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally sustainable under the EU with an environmental objective in economic activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not Χ make any sustainable investments with a social objective: ___%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental

objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promotes ESG business practice investing mainly in financial securities issued by companies having formally declared the adoption of virtuous corporate policies, i.e. codes of conduct and policies respecting human rights, protection of child work and environment, appropriate internal risk management and distribution structures, clear policies of tax strategy.

Moreover, the following circumstances have contributed to the promotion of environmental and social characteristics:

- stringent constraints imposed on the portfolio manager who is forced to be significantly orientated towards investments in companies characterized by high ESG ratings, attributed by leading ESG rating providers;
- the substantial exclusion of investments in controversial sectors and activities;
- the incentive to invest in financial instruments that promote environmental and social characteristics (Green bonds and Social bonds).

How did the sustainability indicators perform?

The *average portfolio ESG Rating* of this financial instrument should be equal or greater than 55. With reference to year 2022, the monthly assessment of this indicator registered:

- Minimum: 75.00

- Maximum: 78.80

Average: 76.09

31st December 2022: 78.80

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The asset allocation may vary over time, in compliance with the investment restrictions indicated by the investment policy set out in the Prospectus. Although the minimum proportion of investments aligned with E/S characteristics envisaged for the financial product is 68%, this amounted to 70.53% as at 31st December 2022.

The residual proportion of investments included:

- ancillary liquid assets (cash and cash equivalents);
- UCI which are not classified as Article 8 or 9 under SFDR (Regulation EU 2019/2088);
- investments for which the ESG rating is in the worst quartile;
- investments for which an ESG rating is not available or cannot be calculated and therefore an ESG rating of zero is prudently assigned.

In which economic sectors were the investments made?

The investments aligned with E/S characteristics are primarly focused on the manufacturing sector and financial and insurance activities, followed by the information and communication sector.

Taxonomy-aligned activities are expressed as a share of:

- turnover lecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

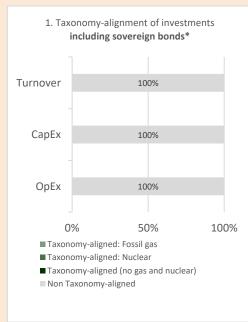

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

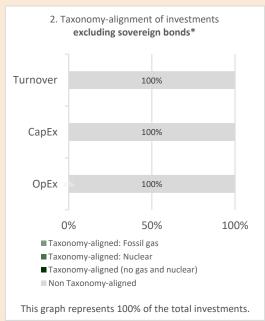

The financial product promotes environmental characteristics but does not aim at investing in environmentally sustainable economic activities. Therefore, the investments underlying the financial product do not take into account the EU criteria for eco-sustainable economic activities, pursuant to the Taxonomy Regulation.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy²?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

As the Fund did not commit to invest in any sustainable investment within the meaning of the EU Taxonomy, the minimum share of investment in transitional and enabling activities within the meaning of the EU Taxonomy has also been 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The residual proportion of investments includes:

- ancillary liquid assets (cash and cash equivalents);
- UCI which are not classified as Article 8 or 9 under SFDR (Regulation EU 2019/2088);
- investments for which the ESG rating is in the worst quartile;
- investments for which an ESG rating is not available or cannot be calculated and threfore an ESG rating of zero is prudently assigned.

Derivatives were not used to promote environmental and social characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The financial product has integrated ESG aspects into the investment process through:

• the improvement of the overall sustainability of the portfolio, by calculating an average ESG rating of the portfolio according to the methodology reported in the "ESG integration"

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

practices section of the Prospectus and on the website of the management company and of the financial product;

- the strict definition of specific binding elements used to select the investments to which the investments must comply. They concern, inter alia:
- the monitoring of the quality of the corporate issuers, preferring those who have formally declared the adoption of corporate policies on respect of human rights, protection of child labor, respect for the environment;
- the compliance with a minimum investment in financial instruments with a very high ESG rating;
- the restriction to a maximum amount of investment in instruments without or with a low ESG rating;
- the application of the exclusion criteria.

How did this financial product perform compared to the reference benchmark?

ANNEX IV

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an

environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promotes ESG business practice.

With regards to the possible allocation to government bonds, the financial product promotes:

• environmental characteristics linked to the environmental sustainability of the issuing states and to the protection of the climate, in accordance with the signing of the Paris Treaties (COP21);

• social characteristics such as adequate education expenditure and the fight against corruption.

With regards to the allocation to corporate issuers, the financial product promotes ESG business practice investing in financial securities issued by companies having formally declared the adoption of virtuous corporate policies, i.e. codes of conduct and policies respecting human rights, protection of child work and environment, appropriate internal risk management and distribution structures, clear policies of tax strategy.

Moreover, the following circumstances contributed to the promotion of environmental and social characteristics:

- stringent constraints imposed on the portfolio manager who is forced to be significantly orientated towards investments in companies characterized by high ESG ratings, attributed by leading ESG rating providers;
- the substantial exclusion of investments in controversial sectors and activities;
- the incentive to invest in financial instruments that promote environmental and social characteristics (Green bonds and Social bonds).

How did the sustainability indicators perform?

The average portfolio ESG Rating of this financial instrument should be equal or greater than 65. With reference to year 2022, the monthly assessment of this indicator registered:

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The asset allocation may vary over time, in compliance with the investment restrictions indicated by the investment policy set out in the Prospectus. Although the minimum proportion of investments aligned with E/S characteristics envisaged for the financial product is 72%, this amounted to 84.20% as at 31st December 2022.

The residual proportion of investments included:

- ancillary liquid assets (cash and cash equivalents);
- UCI which are not classified as Article 8 or 9 under SFDR (Regulation EU 2019/2088);
- investments for which the ESG rating is in the worst quartile;
- investments for which an ESG rating is not available or cannot be calculated and therefore an ESG rating of zero is prudently assigned.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental

Transitional activities are

objective.

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Investments aligned to E/S characteristics are primarily focused on the manufacturing sector although investments are also made in other sectors, notably energy supply and mining.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product promotes environmental characteristics but does not aim at investing in environmentally sustainable economic activities. Therefore, the investments underlying the financial product do not take into account the EU criteria for eco-sustainable economic activities, pursuant to the Taxonomy Regulation.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁴?

| | Yes: | | | |
|---|------|---------------|----|----------------|
| | | In fossil gas | In | nuclear energy |

companies follow
good governance

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The financial product promotes ESG business practice.

With regards to the possible allocation to government bonds, the financial product promotes:

- environmental characteristics linked to the environmental sustainability of the issuing states and to the protection of the climate, in accordance with the signing of the Paris Treaties (COP21);
- social characteristics such as adequate education expenditure and the fight against corruption.

With regards to the allocation to corporate issuers, the financial product promotes ESG business practice investing in financial securities issued by companies having formally declared the adoption of virtuous corporate policies, i.e. codes of conduct and policies respecting human rights, protection of child work and environment, appropriate internal risk management and distribution structures, clear policies of tax strategy.

Moreover, the following circumstances contributed to the promotion of environmental and social characteristics:

- stringent constraints imposed on the portfolio manager who is forced to be significantly orientated towards investments in companies characterized by high ESG ratings, attributed by leading ESG rating providers;
- the substantial exclusion of investments in controversial sectors and activities;
- the incentive to invest in financial instruments that promote environmental and social characteristics (UCI SFDR Art. 9, Green bonds and Social bonds).

How did the sustainability indicators perform?

The average portfolio ESG Rating of this financial instrument should be equal or greater than 55. With reference to year 2022, the monthly assessment of this indicator registered:

- Minimum: 67.80

Maximum: 77.30

Average: 72.45

31st December 2022: 77.30

What was the proportion of sustainability-related investments?

What was the asset allocation?

The asset allocation may vary over time, in compliance with the investment restrictions indicated by the investment policy set out in the Prospectus. Although the minimum proportion of investments aligned with E/S characteristics envisaged for the financial product is 35%, this amounted to 88.47% as at 31st December 2022.

The residual proportion of investments included:

- ancillary liquid assets (cash and cash equivalents);
- UCI which are not classified as Article 8 or 9 under SFDR (Regulation EU 2019/2088);
- investments for which the ESG rating is in the worst quartile;
- investments for which an ESG rating is not available or cannot be calculated and therefore an ESG rating of zero is prudently assigned.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

The investments aligned with E/S characteristics are mainly related to government bonds issued by European countries signatories of the Paris Treaties (COP21) and with adequate education expenditure and fight against corruption.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product promotes environmental characteristics but does not aim at investing in environmentally sustainable economic activities. Therefore, the investments underlying the financial product do not take into account the EU criteria for eco-sustainable economic activities, pursuant to the Taxonomy Regulation.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁵?

| | Yes: | | | |
|---|------|---------------|-------|--------------|
| | | In fossil gas | In nu | clear energy |
| X | No | | | |

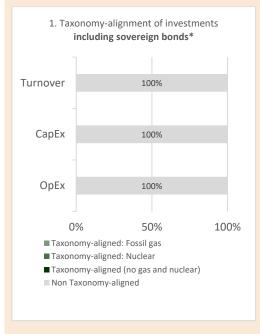

⁵ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

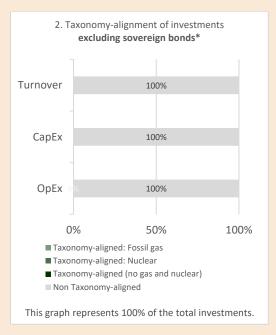

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

As the Fund did not commit to invest in any sustainable investment within the meaning of the EU Taxonomy, the minimum share of investment in transitional and enabling activities within the meaning of the EU Taxonomy has also been 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The residual proportion of investments includes:

- ancillary liquid assets (cash and cash equivalents);
- UCI which are not classified as Article 8 or 9 under SFDR (Regulation EU 2019/2088);
- investments for which the ESG rating is in the worst quartile;
- investments for which an ESG rating is not available or cannot be calculated and threfore an ESG rating of zero is prudently assigned.

Derivatives were not used to promote environmental and social characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The financial product has integrated ESG aspects into the investment process through:

- the improvement of the overall sustainability of the portfolio, by calculating an average ESG rating of the portfolio according to the methodology reported in the "ESG integration" practices section of the Prospectus and on the website of the management company and of the financial product;
- the strict definition of specific binding elements used to select the investments to which the investments must comply. They concern, *inter alia*:
- taking into consideration of the quality of government issuers, with preference for countries committed to climate protection, expenditure on education and fight against corruption;
- taking into consideration the quality of the corporate issuers, preferring those who have formally declared the adoption of corporate policies on respect of human rights, protection of child labor, respect for the environment;
- taking into consideration the quality of the UCITS used, preferring those committed to sustainability;
- the compliance with a minimum investment in financial instruments with a very high ESG rating, including Green Bonds and Social Bonds;
- the application of the exclusion criteria.

How did this financial product perform compared to the reference benchmark?

practices.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promotes ESG business practice.

With regards to the possible allocation to government bonds, the financial product promotes:

- environmental characteristics linked to the environmental sustainability of the issuing states and to the protection of the climate, in accordance with the signing of the Paris Treaties (COP21);
- social characteristics such as adequate education expenditure and the fight against corruption.

With regards to the allocation to corporate issuers, the financial product promotes ESG business practice investing in financial securities issued by companies having formally declared the adoption of virtuous corporate policies, i.e. codes of conduct and policies respecting human rights, protection of child work and environment, appropriate internal risk management and distribution structures, clear policies of tax strategy.

Moreover, the following circumstances contributed to the promotion of environmental and social characteristics:

- stringent constraints imposed on the portfolio manager who is forced to be significantly orientated towards investments in companies characterized by high ESG ratings, attributed by leading ESG rating providers;
- the substantial exclusion of investments in controversial sectors and activities;
- the incentive to invest in financial instruments that promote environmental and social characteristics (Green bonds and Social bonds).

How did the sustainability indicators perform?

The average portfolio ESG Rating of this financial instrument should be equal or greater than 65. With reference to year 2022, the monthly assessment of this indicator registered:

Minimum: 86.90

- Maximum: 92.20

Average: 88.88

- 31st December 2022: 89.50

...and compared to previous periods?

Not applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | | | | |
|--|--|--|--|--|--|--|
| Yes | • No | | | | | |
| It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | | | | |
| It made sustainable investments with a social objective:% | X It promoted E/S characteristics, but did not make any sustainable investments | | | | | |

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be

aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted good business practices by favoring investments in small and medium-sized enterprises which, also in terms of size, favor the circular economy. Furthermore, among the micro caps, particular attention was paid to those characterized by sustainable activity (which pursues one of the 17 SDGs developed by the United Nations) or which demonstrate an adequate commitment to sustainability.

Moreover, the following circumstances contributed to the promotion of environmental and social characteristics:

- stringent constraints imposed on the portfolio manager who is forced to be significantly orientated towards investments in companies characterized by high ESG ratings, attributed by leading ESG rating providers;
- the substantial exclusion of investments in controversial sectors and activities;
- the incentive to invest in financial instruments that promote environmental and social characteristics (Green bonds and Social bonds).

How did the sustainability indicators perform?

Asset allocation describes the

share of investments in specific assets.

What was the asset allocation?

The asset allocation may vary over time, in compliance with the investment restrictions indicated by the investment policy set out in the Prospectus. Although the minimum proportion of investments aligned with E/S characteristics envisaged for the financial product is 20%, this amounted to 74.17% as at 31st December 2022.

The residual proportion of investments included:

- ancillary liquid assets (cash and cash equivalents);
- investments in companies where ESG rating is not available just because they are small and medium-sized companies: an ESG rating of zero is prudently assigned although these companies pursues one of the 17 SDGs developed by the United Nations or demonstrate an adequate commitment to sustainability;
- investments for which the ESG rating is in the worst quartile;
- UCI which are not classified as Article 8 or 9 under SFDR (Regulation EU 2019/2088).

In which economic sectors were the investments made?

The financial product invests in government bonds issued by European countries signatories of the Paris Treaties (COP21) and with adequate education expenditure and fight against corruption (14.04% as at 31st December 2022). The investments in corporate

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

issuers aligned with E/S characteristics are primarly focused on the finacial and insurance sector, but also energy supply, manufacturing, transporting and storage sector.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product promotes environmental characteristics but does not aim at investing in environmentally sustainable economic activities. Therefore, the investments underlying the financial product do not take into account the EU criteria for eco-sustainable economic activities, pursuant to the Taxonomy Regulation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The financial product has integrated ESG aspects into the investment process through

- the improvement of the overall sustainability of the portfolio, by calculating an average ESG rating of the portfolio according to the methodology reported in the "ESG integration" practices section of the Prospectus and on the website of the management company and of the financial product;
- the strict definition of specific binding elements used to select the investments to which the investments must comply. They concern, *inter alia*:
- taking into consideration the quality of the corporate issuers, preferring those who have formally declared the adoption of corporate policies on respect of human rights, protection of child labor, respect for the environment;
- committing the asset manager to invest a significant portion of the portfolio in mediumsized companies and a smaller stake in "micro-caps", considering that among the "microcaps" cases of relocation of production are very rare and, instead, there are very significant benefits on the community of reference (also in terms of economic growth and employment in the territory), and therefore that the allocation of resources on these microcaps promotes the development of a more circular, resilient and sustainable economic system in the long term;
- the compliance with a minimum investment in financial instruments with a very high ESG rating, including Green Bonds and Social Bonds;
- the application of the exclusion criteria.

How did this financial product perform compared to the reference benchmark?
