Risk and Reward Profile

- The risk category is based on a synthetic indicator linked to historical data over a 5-year period and is not a reliable indication about the future risk profile of this class of shares; it is not guaranteed and it may change over time;
- The Sub-Fund has not been launched yet so, without historical performance, the risk category was set at 4 on the basis of the moderate volatility of the benchmark;
- The lowest rating does not mean a risk-free investment;
- This Sub-Fund is not a guaranteed capital fund and the following **risks**, though not detected by the synthetic indicator, can be relevant for the Sub-Fund:
 - Significant changes in interest rates may cause large fluctuations in bonds;
 - The overall performance of a portfolio could be affected by the insolvency of one or more issuers;
 - The market value of equities may change significantly;
 - Derivative instruments can be used to increase, limit or keep the risk level of the Sub-Fund. The strategy implemented by the Manager may not always be successful and the Sub-Fund could therefore incur in significant losses;
 - Under certain market conditions, especially when the market is characterized by very low trading volumes, the sale of some financial securities could be particularly penalizing because of the lack of an adequate number of counterparties;
