What is this product?

Type

The SICAV is a Luxembourg Investment company subject to the provisions of Part I of the Law of 17 December 2010, relating to undertakings for collective investment in transferable securities (UCITS).

Term

There is no maturity date. The SICAV has been established for an unlimited period of time. Natam may terminate the SICAV and the Sub-Funds early, following the procedures described in §23 and §24 of the Prospectus.

Objectives

Investment objective The aim of the Sub-Fund is to achieve a highly diversified exposure to corporate bonds in order to obtain the best possible risk-return combination by implementing an attentive risk reduction policy and also taking into account the need to promote environmental social and governance characteristics on the investments (ESG factors), mitigating the relevant sustainability risk.

Investment policies The selection of the issues is based on a well-established and partially quantitative valuation methodology, which aims at identifying securities having an interesting profitability potential in different areas for investors.

The Sub-Fund invests in debt securities, mainly corporate bonds, denominated in Euros with minimum rating "investment grade" for at least 90% of such investments; under exceptional circumstances up to 5% of investments may be made in bonds with minimum rating between C and CCC+.

The Sub-Fund may invest in credit derivative instruments, (i.e. Credit Default Swaps, Credit Spread Derivatives that allow two parties to exchange the credit risks specific to some issuers) in order to hedge the specific credit risk for some issuers within the portfolio. The expected leverage, calculated through the commitment approach, is therefore maintained at zero, with the exception of the derivative component of the convertible bonds. The expected leverage (calculated as a sum of notionals) is not expected to exceed 100%.

The average portfolio duration, which is the average life of the assets composing it, is always maintained within a narrow period ranging from 2.8 and 3.5 years; derivatives cannot be used for investment purposes and leverage is not allowed either.

The "ESG features", according to art.8 of EU Regulation 2019/2088, are implemented through a two-level approach:

1. an average portfolio ESG rating, determined with a proprietary model, which must be kept above the level of 65

2. a set of specific restrictions and investment limits identified to promote sustainable investments.

The specific investment limits are detailed in the specific section "Sustainability criteria in investment decisions" in Appendix II of the Prospectus. Regarding the Taxonomy Regulation, the underlying investments do not take into account the EU criteria for environmentally sustainable economic activities.

Benchmark 95% B-Barclays Euro Corp TR 1-5 Y (LEC4TREU) + 5% €STR: BCE euro short-term rate index (ESTCINDEX Index)

Benchmark uses Discretion is allowed with respect to the benchmark. The Investment manager may invest in financial instruments not included in the benchmark in order to take advantage of specific investment opportunities. This active management approach involves a deviation from the reference index which can be significant.

The Sub-Fund is not intended to track the benchmark

Redemption and Dealing Investors may redeem their shares on any business day for Luxembourg banks. They can also switch some or all their shares in those of another Sub-Fund and/or Class (with the exception of Class "L") within the SICAV without paying any extra fee.

Distribution Policy All income is, normally, reinvested.

Intended retail investor

This share class is intended for Institutional clients only, with a medium-term investment horizon and having preference for products complying with the ESG factors.

Practical information

Depository The SICAV depository is State Street Bank International GmbH, Luxembourg branch.

Further information A copy of the Prospectus, the latest annual and semiannual financial report of New Millennium are available free of charge in English and Italian on the websites www.natam.lu, www.newmillenniumsicav.com and at the registered office of the Fund (49, avenue J.F.Kennedy, L-1855 Luxembourg). Also the latest Net Asset Value per share are published on www.natam.lu and www.newmillenniumsicav.com

The information contained in this document is specific to Large Europe Corporate. However, the Prospectus, annual and half-yearly reports are prepared for the SICAV as a whole.

The SICAV consists of separate Sub-Funds with segregated liabilities. This means that the assets of a Sub-Fund will not be available to meet the claims of a creditor made against another Sub-Fund.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between September 2019 and September 2023.

Moderate: this type of scenario occurred for an investment between November 2017 and November 2021.

Favourable: this type of scenario occurred for an investment between December 2013 and December 2017.

What happens if NATAM Management Company S.A. is unable to pay out?

In the event of Natam's insolvency, the assets of the SICAV will not be affected. The assets of the SICAV are held in safekeeping by the Depository, that is required by law to segregate its own assets from the assets of the Sicav.

If the fund is not able to pay you out what is due, you may lose your entire investment. Losses are not covered by an investor's compensation or guaranteed scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

We have classified this product as 2 out of 7, which is a low risk class.

This means that potential losses due to the future performance of the product are rated a low level and that adverse market conditions are very unlikely to affect the sub-fund's ability to return the initial capital.

Be aware of currency risk when your reference currency differs from that of the product. You might receive payments in a different currency, so the final return depends on the exchange rate applied.

This product does not include any protection from future market performance so you could lose part or all your investment. The significant risks not detected by the synthetic indicator, are detailed in the "Main risk factors" section of the relevant Sub-Fund Appendix of the Prospectus.

- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 4 years (recommended holding period)
Total Costs	92 EUR	367 EUR
Annual cost impact*	0.9%	0.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.0% before costs and 0.1% after costs.
