

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Total Return Flexible - “A-CHF-Hedged”

A Sub-Fund of New Millennium

“Capitalization” shares (ISIN LU1675756503)

This SICAV is managed by NATAM Management Company S.A.

Objective and Investment Policy

- **AZ Swiss & Partners S.A.** is the Investment Manager of the Sub-fund;
- The objective of the Sub-Fund is to achieve positive net returns in excess of those which can be normally earned from risk-free financial investments, as constantly as possible and in any market condition, maintaining a moderate level of risk;
- Through discretionary choices and in function of the different market conditions, the Sub-Fund dynamically changes the various components of the portfolio which consists of:
 - bonds rated at least “*investment grade*”
 - equity securities with a maximum of 60%
 - money market instruments up to 100% of the portfolio
- Investment in fixed income instruments will be prevalently in investment grade instruments with a minimum rating BBB/Baa although a residual investment in not rated and *non-investment grade* securities is allowed, with an adequate diversification, up to 25% of the net asset value; under exceptional circumstances up to 5% of investments may be made in bonds with minimum rating between C and CCC+;
- Derivative instruments, which are financial contracts whose value depends on the market price of a reference asset, can be used for hedging and investment purposes provided that the total commitment does not exceed 50% of the net asset value;
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money in a time horizon shorter than medium term (3-5 years)
- Investors may redeem their shares on any business day for Luxembourg banks;
- All income is, normally, reinvested

Risk and Reward Profile

- The risk category is based on a synthetic indicator linked to historical data over a 5-year period and is not a reliable indication about the future risk profile of this class of shares; it is not guaranteed and it may change over time;
- The risk indicator for the Sub-Fund is set at 3 because the volatility of its past returns has been medium-low mainly because the returns of fixed and variable rate bonds and monetary instruments denominated in EUR can fluctuate and because equity markets can fluctuate too;
- The lowest rating does not mean a risk-free investment;
- This Sub-Fund is not a guaranteed capital fund and the following **risks**, though not detected by the synthetic indicator, can be relevant for the Sub-Fund:
 - Significant changes in interest rates may cause large fluctuations in bonds;
 - The overall performance of a portfolio could be affected by the insolvency of one or more issuers;
 - The market value of equities may change significantly;
 - Derivative instruments can be used to increase, limit or keep the risk level of the Sub-Fund. The strategy implemented by the Manager may not always be successful and the Sub-Fund could therefore incur in significant losses;
 - Under certain market conditions, especially when the market is characterized by very low trading volumes, the sale of some financial securities could be particularly penalizing because of the lack of an adequate number of counterparties
- The value of the investment may rise as well as fall significantly and it is possible to receive less than originally invested;
