VolActive - "L"

A Sub-Fund of New Millennium

"Capitalization" shares (ISIN LU1148874800)

This SICAV is managed by NATAM Management Company S.A.

Objective and Investment Policy

- **Banca Finnat Euramerica S.p.A.** is the Investment Manager of the Sub-fund;
- The Sub-Fund seeks to achieve capital growth in every market condition;
- Through discretionary choices, the Sub-Fund invests primarily in money market instruments, bonds, futures on VIX index but investment in equities is also allowed with a maximum limit of 30% of net assets;
- Fixed income instruments will be denominated in EUR and/or USD, issued mainly by government and supranational issuers; the investment in *not-investment grade* instruments is allowed up to 35% of the Sub-Fund's net asset value; under exceptional circumstances up to 5% of investments may be made in bonds with minimum rating between C and CCC+;
- The Sub-fund is characterized by an active management of the market volatility through the use of exchange traded futures on the VIX index, a popular measure of the volatility. Its future is commonly used as a protection against the increase in the market's volatility. The investment decision on VIX futures are generally taken on technical analysis in order to identify the volatility trends over short and long periods;
- Derivative instruments, which are financial contracts whose value depends on the market price of a reference asset, can also be used for investment purposes provided that the total commitment does not exceed, at any moment, 100% of the net asset value of the Sub-Fund;
- The Sub-Fund may be exposed to currency risk which is, however, mitigated by the hedging against Euro of the main currency positions;
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years
- Investors may trade their shares on any business day for Luxembourg banks provided that the stock exchange in which the shares are tradable is open for trading and that it is possible to cope with the orders
- All income is, normally, reinvested.

Risk and Reward Profile

- The risk category is based on a synthetic indicator linked to historical data over a 5-year period and is not a reliable indication about the future risk profile of this class of shares; it is not guaranteed and it may change over time;
- The Sub-Fund was recently launched so, without historical performance, the risk category was set at 6 on the basis of the high volatility of a representative portfolio;
- The lowest rating does not mean a risk-free investment;
- This Sub-Fund is not a guaranteed capital fund and the following **risks**, though not detected by the synthetic indicator, can be relevant for the Sub-Fund:
 - The value of the investment may rise as well as fall significantly and it is possible to receive less than originally invested;
 - Significant changes in interest rates may cause large fluctuations in bonds;
 - The overall performance of a portfolio could be affected by the insolvency of one or more issuers;
- The value of equities, in particular, may change significantly;
- Derivative instruments can be used to increase, limit or keep the risk level of the Sub-Fund. The strategy implemented by the Manager may not always be successful and the Sub-Fund could therefore incur in significant losses;
- With specific reference to the investment in VIX index future, the sub-fund is subject to high level of risk being linked to potential high level of exposure to the underlying index;
- Fluctuations in currency exchange rates can negatively affect the return of the investment. The currency hedging may not totally reduce this risk;
- Under certain market conditions, especially when the market is characterized by very low trading volumes, the sale of some financial securities could be particularly penalizing because of the lack of an adequate number of counterparties
